PROJECTS

Venue Vendor | *Next.js, Express, TypeORM, Microsoft SQL Server*

Coursework

- Led a 2-person team to design and build a full-stack venue booking platform, implementing 10+ RESTful endpoints and a normalized relational schema in Microsoft SQL Server
- Built a GraphQL API for admin-side CRUD operations across users, venues, and subscriptions, enabling flexible querying alongside REST endpoints used for core booking functionality
- Architected backend using MVC pattern and frontend using reusable React components; coordinated with stakeholders to translate requirements into technical specs

Task Manager | *Java Spring Boot, React, Tailwind CSS, PostgreSQL*

[GitHub](#)

- Built and deployed a full-stack task manager with JWT-based authentication and full CRUD functionality across 5+ entity relationships in PostgreSQL
- Designed a responsive React frontend with task filtering, sorting, and inline editing, styled with Tailwind CSS
- Independently owned the full development lifecycle — API design, database schema, frontend, deployment — applying MVC and REST best practices

EventHub | *Java Spring Boot, Thymeleaf, MySQL, Docker*

Coursework

- Implemented core features including user authentication, event creation/booking logic, and event filtering within a 6-person Agile/Scrum team across 4+ sprints
- Built an admin dashboard for managing events and scheduling, and developed responsive frontend pages using Thymeleaf
- Integrated MySQL for data persistence and containerized the application and database with Docker for consistent deployment across environments

Personal Portfolio | *React, Vite, Tailwind CSS*

[GitHub](#) | [Live](#)

- Built and deployed a responsive personal portfolio using React and Vite, showcasing projects via interactive component-based cards
