EDUCATION

RMIT UNIVERSITY

Bachelor of Computer Science

Melbourne, VIC

Expected Nov 2027

Major in Enterprise System Development; Minors in Data Science

Relevant Coursework: Java Programming Bootcamp, Java Programming Studio, Software Eng Fundamentals, Algorithms and Analysis, Further Programming, Software Eng: Process & Tools, Software Testing, Full Stack Development, Machine Learning, Database Applications

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, Python

Tools and Frameworks: Spring Boot, Node.js, Next.js, React.js, Docker, Git, MySQL, PostgreSQL, Tailwind CSS

PROJECTS

Venue Vendor | Course work

Present

- Leading a team of 2 to build a full-stack venue booking web application using Next.js, Express, TypeORM, and Microsoft SQL Server
- Designing and implementing a RESTful API with GraphQL integration for data access and retrieval
- Structuring the backend MVC design pattern and the frontend with component-based React design
- Managing project planning, code reviews, and task delegation as team lead

Task Manager | [GitHub](#)

Mar 2026

- Built a full-stack task manager application using Java Spring Boot and React + Tailwind CSS with PostgreSQL database
- Designed and implemented RESTful API supporting full CRUD operations for task management
- Implemented basic JWT authentication for user login and session management
- Structured the backend with MVC design pattern and the frontend with component-based React design
- Developed a responsive UI with task creation, editing, and filtering functionality
- Managed the project independently, practising problem-solving, debugging, researching, and industry best practices

Personal Website | [GitHub](#) | [Live Demo](#)

Mar 2026

- Built a responsive personal portfolio using Vite, React, and Tailwind CSS
- Designed interactive project cards and a contact section to showcase skills and experience

EventHub | Course work

Nov 2024

- Collaborated with a team of 6 using Agile/Scrum methodology to develop a web application
- Build backend functionality with Java Spring Boot and Thymeleaf, handling routing and server-side rendering
- Integrated and managed data in MySQL database for data access and retrieval
- Containerized both web application and database with Docker for consistent deployment
- Contributed to sprint planning, code review, and testing throughout the development cycle

ACTIVITIES

Australian Computer Society

Melbourne, VIC

Student Member

Mar 2024 – Present

- Attended industry networking events and professional development workshops

CSIT Society

Melbourne, VIC

Student Member

Mar 2024 – Present

- Participated in community discord focused on software development
